

TECHNICAL NOTE N. 00194/CU - 03/08/2017

SUBJECT: REPLACEMENT CODES FOR TRIO DW POWER CARDS P/N. 41014239 & P/N. 41032409.

A) REASON FOR THE UNAVAILABILITY OF THE SPARE PARTS:

The two Electronic Cards P/N. 41032409 and P/N. 41014239 for the Dishwasher Section of some Trio and Duo appliances are no longer produced by the INTEA supplier, and therefore were rendered unsaleable. The two Cards grouped into a single element both the Pushbutton Card and the Power Card (see figure). The two Cards had identical functions and differ only for the presence or not of the Liters-Meter device.

B) SOLUTION TO THE UNAVAILABILITY OF THE SPARE PARTS:

It's possible to use a new, single assembly (from the BITRON provider) featuring a "liters-meter" function and consisting of a Power Card P/N. 41029031 and a Push-Button Card P/N. 41037544 to replace both cards described in A). Before being mounted on the Dishwasher, the new Power Card assy must be assembled, by fitting the connector of the wiring that comes from the new Pushbutton Card onto the new Power Card. The use of the assembly consisting of the two new Cards also requires the following additional steps:

- B1) Replacement of the original Wiring of the Dishwasher with a new Wiring (whose Part Number is listed in the following table), that is related and specific to the new Boards assembly.
- B2) Replacement of the original Dashboard of the Dishwasher with a new Dashboard related and specific to the new Boards assembly, whose Part Number is listed in the following table. This is because the new Boards Assembly has new additional Functions and different Washing Programs with various improvements, if compared to those provided by the previous two old Electronic Cards now no longer available.
- B3) Replacement of the original Solenoid Valve for water load of the Dishwasher with a new Solenoid Valve, needed to use the "Liters-Meter" function now available with the new Cards Assembly.
- B4) Supply to the End User of the Trio or Duo, of a new User Manual to allow the easy use of new Washing Cycles and of the new functions now available with the new Cards Assembly.

All Part Numbers of all new components to be ordered are listed in the Table on the next page.

Product Code	Model Name	Dashboard	Wiring Assembly	Solenoid Valve	Pushbutton Card	Power Card	Wiring Diagram	User Manual
